Question: What is your overall opinion of this instructor as a teacher? Explain.

Response Rate: 96.15% (25 of 26)

- 1 Great teacher and genuinely cares that we understand the subject and what is required from the students.
- 2 Very knowledgeable on the topic. Very interested and really cares about the students.
- 3 Professor Lorent himself is a very qualified and skilled teacher. He makes himself readily available to students needing help.
Professor Lorent explains topics thoroughly and answers all questions to make sure his students are understanding what he's saying. He does a great job of making sure the students know what is going on and can follow him through examples step-by-step.
- 4 Prof. Lorent is much better than Prof. Dragan who started the class and he actually explains things in class to where I can understand them.
We have only had professor Lorent for half the year but right off the bat I liked him. He uses most of the lecture time to clearly explain what is going on. I am use to getting a brief description and lots of example. Prof Lorent gives a good description and little examples, in lecture. What truly makes him shine is the help sessions he holds on fridays and a review session. Very effective professor.
- 5 He is a very good instructor. Wish we had quizzes to make sure we were learning the material.
- 6 Professor Lorent is brilliant...a little austere at times, but brilliant. He definitely deserves to stay on staff and continue teaching. He is a valuable asset to the math program here at UC!
- 7 Professor Lorent seems passionate about teaching Calculus II and ensuring that his students are in full comprehension with the material. He's a cool dude.
I think he's a exceptional teacher. He seems very interested in the content he's teaching and even will take time to explain the significance of what we're learning instead of just telling us how to do it. One thing in particular I enjoyed was his explanation of math as a picture and to visually imagine it and understand how it's derived as opposed to just following a formula. I thought his outside resources like the extra study session he provided Friday afternoon was also a very beneficial learning tool. Overall Professor Lorent knew what he was teaching and taught it well.
- 8 Awesome guy. Takes his job very seriously.
Professor Lorent comes into class and motivates us to learn. Whenever classmates talk amongst themselves, he always pushes them to share the question with the class and this helps everyone out. He goes until the very last minute of class and because he makes sure that we understand topics. For the hard ones he spends a little extra time and hases the class raise their hand if they understand. If there is not enough hands he continues to explain.
- 9 Great teacher
- 10 I believe that he is very well-prepared for each lecture, and I enjoy the fact that he really likes to interact with us.
- 11 Great Teacher
- 12 Great professor. I had a very unhelpful professor the first time I took this class, Prof. Lorent has explained things in five minutes that I never understood last semester. A+ 10/10 would recommend.
- 13 The best math teacher I have had since grade school! Gave great examples and interacted with the class instead of just lecturing. Made sure that the students understood the topics.
- 14 Very knowledgeable and effective at explaining concepts, can pace a little fast but necessary to cover material

- 19 Great teacher, encourages questions and offers assistance outside of class
- 20 He cares about the success of his students.
- 21 Prof. Lorent is a very enthusiastic and helpful professor. He loves the subject and enjoys teaching it very much.
- 22 Professor Lorent is a good professor, but it was very detrimental to my learning that he came in half way through the semester.
- 23 I like him he is pretty good.
- 24 He's a pretty good teacher. He explains concepts with props a lot and it helps. He is a very nice dude who is enthusiastic about the subject.
- 25 He is pretty good

Faculty: Lorent, Andrew H

Question: Comments and/or suggestions

Response Rate: 61.54% (16 of 26)

- 1 N/A
As Professor Lorent was absent and required a substitute for the first two months of the course, all of these surveys will be based on only a month of his teachings. If this survey is intended to be a survey of both Professor Lorent and Professor Dragan, then some of my responses would vary.
- 3 He is doing a good job.
- 4 We should have quizzes to keep us on track and help us have a higher grade.
- 5 The sports bike he drives is freaking awesome.
- 6 He did a very good job. If I were to provide a suggestion it would be to let the students know more about what is expected of them for the tests.
- 7 Great classes.
- 8 buckest
- 9 n/a
- 10 The visualization aspect is something I've never seen a math teacher do, and it's brilliantly helpful, keep doing that. Great job at keeping the class engaged.
- 11 Take longer pauses for students to ask questions
- 12 Sometimes the professor moves too quickly through the material and consequently loses some of the students attention.
- 13 Nope!
- 14 Please do not have a professor come in half way through the semester.
- 15 No suggestions
He needs more examples written down not just the examples in the book that anyone can do, at least some other examples. This irritated me since I learn by examples, but there wasn't any to really learn by during class, but I guess that's why he had practice sessions. He still should do other examples than the ones that are straight of the book.
